

To Whom It May Concern:

I would like to know why we even need this. We can already get the internet over the phone line, the cable TV service, by satellite, wirelessly, and by numerous other methods. I don't see why we need to have yet another means of getting on the internet. The only good thing I can see coming out of it is more competition. This PLC will cause senseless interference to licensed users of the HF spectrum. If you do choose to pass this measure, there should be very stringent regulations on the signals that will be unintentionally radiated by the power lines so that there will be little or no interference.

Respectfully submitted,
Alex Swedenburg
